

# Dorothy House Hospice Care: Gender Pay Gap Report

## (As at 5 April 2022)

### Introduction

As an employer of more than 250 staff, Dorothy House Hospice Care undertakes annual Gender Pay Gap Reporting as required by the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.

Based on a snapshot of 5th April each year, we are required to calculate the following:

1. Mean gender pay gap
2. Median gender pay gap
3. Proportion of males and females in each quartile pay band

As Dorothy House did not pay bonuses, we do not report in this area. Gender Pay Gap Reports must be published within the calendar year.

### What is the mean and median gender pay gap?

The gender pay gap in an organisation is the difference in pay levels between male and female employees, irrespective of the position held, or type of contract of employment, and therefore includes workers on bank contracts. **This is not the same as equal pay where companies are legally required to ensure that men and women are paid the same for doing the same or similar roles.**

The **mean** is calculated by adding up all of the wages of employees in an organisation and dividing that figure by the number of employees. The mean (or average) gender pay gap shows the difference in hourly pay of male pay over female pay as either a positive or a negative figure.

The **median** is the number that falls in the middle of a range when everyone's wages are lined up from smallest to largest and is more representative when there is significant variation in pay. The median (or middle) gender pay gap shows the difference of hourly male pay over female pay as either a positive or negative figure.

When talking about the gender pay gap people tend to talk more about the median figure rather than the mean which can be skewed by a small number of highly paid individuals.

### Findings

#### **Dorothy House Mean Gender Pay Gap, 5 April 2022: +0.63%**

This means that based on an hourly rate, we pay women an average of 0.63% less than men. In 2021, this figure was 2.63%.

#### **Dorothy House Median Gender Pay Gap, 5 April 2022: -14.3%**

This means that based on an hourly rate, we pay women in the middle of the pay scales 14.3% more than men. In April 2021, this pay gap was also -14.3%.

### **Proportion of males and females in each quartile band**

Quartiles are the division of the total workforce into four equal sections or pay bands.

As at 5 April 2022, Dorothy House's workforce of 399 was 83% female with 331 women and 68 men. This does not differ significantly from 2021 with staff numbers of 363 and 82% female.

The gender pay quartiles breakdown is as follows:

Quartile	% Male	% Female
Lower Quartile	25%	75%
Lower Middle Quartile	18%	82%
Upper Middle Quartile	9%	90%
Upper Quartile	16%	84%

### Summary

Our gender pay gap results reflect the fact that, like many hospices and healthcare organisations, Dorothy House employs a largely female workforce. We have strong representation of women in senior roles at Dorothy House as per the table above, including within our Executive Team which had a 50% female membership.

37% of the male workforce are in the lower quartile whereas the female workforce is more evenly spread across the organisation. This imbalance results in Dorothy House's negative gender pay gap based on the median measure, with male employees appearing predominantly at the lower end of pay.

Our intention remains to attract men as well as women to roles across every pay band quartile. Gender balance and diversity are important in ensuring that organisations have a combination of masculine and feminine approaches and solutions, making them more effective and resilient.

### Statement

I confirm that Dorothy House Hospice Care is committed to the principle of gender pay equality and has prepared its 2022- gender pay gap results in line with mandatory requirements.
